Unisto Tamper Evident Labels

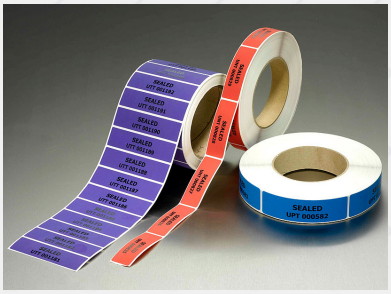

© Unisto, www.unisto.com

Tamper evident labels can be used for a multitude of purposes, and come in a variety of types, and can be used for security sealing applications where a plastic seal would not be suitable – sealing retail packaging for electronic equipment for instance. Once affixed to the surface, the label displays a "VOID" message on any parts of the label which have been peeled off of the original surface, ensuring that as long as the label is in tact that the goods inside are as they were when the vehicle was loaded and sealed.
